

CECIL ANDREWS COLLEGE

FROM Year 7 to Year 12, Cecil Andrews College provides exemplary education with an understanding that every child is different and has different physical, emotional and mental needs.

With special programs in science, technology, mathematics and engineering (STEM), Australian Rules Football and performing arts, Cecil Andrews provides talented children unique pathways for success.

The school's Academic Extension program is also setting new standards for the area and specially trained teachers are creating challenging learning opportunities so each child can meet their potential and become successful.

Providing pathways to university, Tafe and the workplace, the Cecil Andrews P-Tech (Pathways in Technology) program creates unique learning and mentoring partnerships

with industry and is a new way of skilling students for the 21st century.

The school's other offerings include an education support unit to support children with additional needs, a school psychologist and nurse, peer support programs and breakfast club to provide support and life skills for students.

With no prescribed local intake area, Cecil Andrews College welcomes children from across the state.
